

## ***DELTA 2***

Inspiratory  
assistance  
at the  
patient's  
rhythm

Ventilator-patient synchronization is one of the keys to the success of Non Invasive Ventilation (NIV). Delta 2 provides ventilation at two pressure levels and the right settings for optimum patient comfort and better respiratory care.

# DELTA 2 : controlled inspiratory assistance

## SYNCHRONOUS

### Self-adapting trigger

The algorithms of the Delta 2 triggers guarantee synchronization with the patient's ventilation even in case of a leak.

## COMFORTABLE

### Sensitive

The highly sensitive trigger settings can be adapted to meet the patient's specific needs depending on his/her pathology.

### Silent and discrete

With less than 32 db and compact size, Delta 2 fits in perfectly at the patient's bedside.

### Built-in humidification\*

The Humidys module delivers the right humidification for the patient's comfort and acceptance.

## DETAILED COMPLIANCE

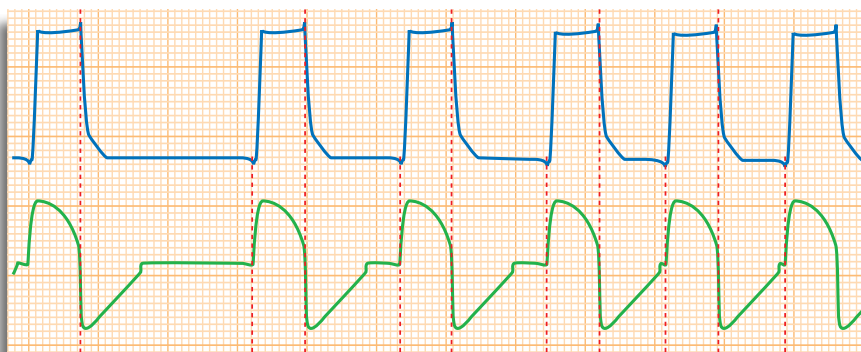

Delta 2 offers efficient patient treatment monitoring thanks to the Bora Soft and Direct Observance observation software.

## EFFICIENT

The efficient ventilatory performances and the sensitivity of the Delta 2 triggers provide the comfort required for respiratory assistance.

## SAFE

### Settings

The possibility of setting maximum inspiratory times and minimum frequency ensures safe ventilation for the patient.

### Alarms

Uninterrupted ventilation is guaranteed by the power failure and patient disconnection alarms (disengageable) and the emergency battery system.
